TELEGRAPHIC NEWS BRIEFLY CHRONICLED

An Abundance Food, Clothing And Shelter

The Cranbrook Courier says everything God made is here in the same abundance that has always characterized His creation. There is an abundance of life and the things that support it--food, clothing and shelter. There is an abundance of all the things that make life worth living--peace, quiet, gentleness, love, good deeds, gratitude, energy, thrift, companionship. Now what is lacking from the picture? Only the one thing which man has created--money.

Money, we hear every day, is scarce, and that is the commodity that has only man back of it. When have given impetus to the circulation of money or when we have invented a circulating medium to take the place of money we will move on as if nothing had ever happened. When a kind Providence removes greed and avarice from the human system this world will be a perfect place to dwell in.

Ex-Minister of Canadian Cabinet Dies

Ottawa, August 25. -- Senator Gideon D. Robertson, former Conservative minister of labor, died here at his home late Friday afternoon. Senator Robertson suffered a paralytic stroke two weeks ago.

For two years, his health has been in poor condition causing his resignation in February, 1932 from the Bennett cabinet.

The late senator was appointed to the Upper Chamber in 1916 was named minister without portfolio in the Borden cabinet in 1917 and the following year became minister of labor. On the return of the present Conservative administration he was re-appointed labor minister.

CEREAL DRUG STORE ENTERED BY THIEVES

CEREAL, Aug. 28. -- M. J. Howey's drug store was visited by burglars early Sunday morning and a considerable amount of plunder was carried away. The safe was not locked and the thieves opened it securing about \$7. They tried to open the cash register, but failed.

The burglars took five dozen fountain pens and pencils and many toilet articles, candy, cigarettes, etc.

W. I. Meeting

The regular meeting of the Chinook Women's Institute will be held at Mrs. M. Chapman's home on Wednesday, September 6, commencing at 2:30 p.m. Assistant hostesses will be Mrs. E. B. Allen and Mrs. C. Bennett. An interesting program has been arranged on "Education and Better Schools," by Mrs. Shier and committee. Inspector Scott and L. Proudfoot, M. L. A. will speak.

The roll call will be, "Prominent people who have furthered the cause of education in Canada."

Mrs. Greenfield Injured In Fatal Auto Collision

Edmonton, Aug. 25. -- Albert Suave, truck driver of Ponoka, was killed last night, and Mrs. Herbert Greenfield, of Calgary, wife of the former premier of Alberta, was badly bruised and suffered slight shock when a lumber truck collided with an automobile near Hobbema, a few miles north of Ponoka.

The lumber in Suave's truck was shifted by the collision, crushing the driver to death against the steering wheel.

Curt Smith, of Wetaskiwin, another occupant of the car suffered a broken wrist.

Chinook Consolidated School Meeting

The Board of Trustees of Chinook Cons. S. D. held a meeting in the school on Tuesday evening, August 22, with all the members being present.

The minutes of the last meeting were read and approved. Then followed the reading of the correspondence and of the bills presented for payment.

The following motions were moved and carried:

Rosenau--That payment of the following bills be approved:

Margaret Bayley, \$22.33
 Lorne Proudfoot, 1.15
 C. W. Rideout, 11.00
 E. E. Jacques, 2.55

McDonald--That school re-open on Monday, Sept. 4.

McDonald--That amount paid for van driving on Route 8 from Sept. 4, be \$3.00.

Rosenau--That beginning Sept. 4, the van on route 1 go to Marchelles and Bennetts and be paid \$3.00 a day and that Cooley Bros. be driver for this route until further notice.

McDonald--That the following arrangement be made for van-driving:

Route 2, L. Dressel, Sept. 4 till further notice.

Route 3, F. Dumanowski, Sept. 4 - Sept. 30.

Route 4, P. Demaree, Sept. 4 till Oct. 31.

Johnston--That further arrangements for van-driving be as follows:

Route 5, H. W. Butts, Sept. 4 to Sept. 30. Harry Forbes, Oct. 1 to Oct. 31.

Route 6, Oscar Nelson, Sept. 4 to Sept. 20. C. W. Rideout, Sept. 21 to Oct. 20.

Route 7, N. F. Marcy, Sept. 4 until further notice.

Route 8, E. E. Jacques, Sept. 4 to Sept. 8, J. E. Peyton, Sept. 11-18, W. A. Todd, Sept. 19-25, N. Murray, Sept. 26 to Oct. 17.

McDonald--That caretaker secure sheepskins necessary for seats and for the bottoms of the school vans.

Lawrence--That except during school hours no children be allowed on the school grounds unless with the permission of the caretaker.

Rosenau--That we do now adjourn to meet again on Saturday evening Sept. 9, at 8 o'clock.

Lorne Proudfoot, Sec. - Treas. and Chairman then called the meeting to a close.

Oranges, Sweet and Juicy, per dozen 25c
 Bulk Soap Chips, Special pkg 25c
 Corn, Frankford, 2 tins 25c
 Fresh ass't, of choice cookies, sodas and Graham wafers.
 Leave orders for preserving Fruit.

CHINOOK ADVANCE

Canada As a Leader

Judged in terms of years, Canada is a very young country, and this fact is brought home to any one who studies the histories of the countries of Europe and Asia. Canada, too, while a country great in area, is of sparse population and in this respect is nowise comparable to the older countries of Asia and Europe, or of the United States.

But during its brief history, Canada and the Canadian people have achieved some truly great things and pioneered in numerous fields which have resulted in conferring outstanding benefits upon all mankind.

Our thoughts are turned in this direction by the centenary of one very notable Canadian achievement. On August 5, 1933, Canadians celebrated the passing of one hundred years since the first vessel crossed the Atlantic Ocean—any ocean in fact—steaming the whole way. It was a Canadian vessel, the "Royal William," built at Quebec and launched on April 29, 1831, and with Canadian built machinery except the cranks and shaft, which made this epoch voyage, sailing from Pictou, Nova Scotia, on August 5, 1833, for London, England.

Other vessels had previously crossed the seas using steam to a certain extent, but no other vessel had ever made the voyage with "steam up" all the way. According to an account of this world-famous vessel appearing in the August number of the Canadian Geographical Journal, the "Royal William" actually established seven primary records—two Canadian records, three foreign records, and two world records.

The "Royal William" was: (1) The first seagoing steamer ever built in Canada; (2) the first steamer that ever plied on international affairs— from Quebec to Halifax; (3) the first steamer that ever entered a U.S. harbor under the Union Jack; (4) the first steam transport in Portugal; (5) the first steam man-of-war in Spain; (6) the first vessel in the world that ever fired a shot in action under steam; (7) the first vessel that ever crossed any ocean steaming the whole way.

In celebration of the centenary of this last mentioned achievement the Canadian Government has issued a special commemorative postage stamp which, unquestionably, will be greatly prized by stamp collectors throughout the world, and which will serve to bring to people in all lands knowledge of this great Canadian achievement of one hundred years ago.

This centenary of the "Royal William" also serves to remind one of other outstanding achievements standing to the credit of Canada, young in years as this Dominion is in relation to other nations. Canadians can recall with pride that it was one of their countrymen, Andrew Graham Bell, who invented the telephone, thus giving to the world one of its most useful and widely used means of communication.

It was a Canadian who developed Marquis wheat, the effect of which has been to greatly extend the area of the world's surface in which wheat can be successfully grown, and it has been Canadians who have continued that work and developed still earlier ripening varieties such as Garnet and Reward.

Great in area but small in population and wealth, Canada has built up in the Canadian Pacific Railway the greatest transportation system in the world. There are other great railways, other great steamship companies, other great telegraph, express and hotel companies, but no other company in the world combines all these services to the same extent and with the same world-wide ramifications as does the C.P.R. The inauguration of the Canadian Pacific was a tremendous undertaking for a mere handful of people in an enormous but undeveloped country, and its success is a tribute to Canadian initiative, energy and determination.

A Canadian gave insulin to the world, that wonderful agency of relief to the diabetic sufferers of the world, and which has prolonged the life of thousands of people afflicted with such disease.

Nor is it a small matter that through the efforts of a few millions of people they have made their country, Canada, the fifth trading nation in a world of trading nations, surpassed only by older, much more populous and wealthier nations.

There are many other fields in which Canada, during its brief history, has led the world, but neither time nor space will permit of extending this recital; sufficient has been recorded here to establish the truth that Canadians have reason to entertain great pride in their country and in its achievements. Nay more, that there is every reason why the people of Canada should have unbounded confidence in the future of their country. All nations throughout the world's history have suffered temporary reverses and setbacks; all have passed through periods of depression and hardship. But where the hearts of the people have been true, where they have not been given over to indulgence and sloth, where they have maintained their virility and strength, where they have been courageous and determined, they have always risen above their troubles and reverses, and gone forward to greater achievements, greater glory, greater prosperity and happiness.

All Canada's past history provides an incentive and encouragement to the Canadian people of today. Opportunity has not ceased to knock at the door of Canada. The future holds more of promise than anything yet realized if our people seize the occasion when "Opportunity" does knock.

Land For Ships

Considerable backing has been given Australia to the proposal recently made by Dr. Duhig, the Roman Catholic Archbishop of Brisbane, that the mandated territory of New Guinea be handed back to Germany on condition that Germany contribute adequate ships for Australia's defence. Mandates for the former German possessions in the Pacific were, divided among Australia, Japan and New Zealand.

Radium contains a tremendous store of energy. Although it gradually breaks up, only half of a given quantity will disappear in 1,800 years.

Growing Corn Indoors

Corn may be made to grow indoors by a new method being tested in England. The seed is sown in trays in a darkened room and treated with chemicals. In 10 days the crop will be 10 inches high and 40 per cent more nourishing than that grown in the ordinary way.

Church thieves are busy in Scotland. Norwegian fishermen caught 49,548,000 codfish this year.

Cyclists of New Zealand are to be compelled to observe traffic rules.

Any Looseness of the Bowels Is Always Dangerous

When the bowels become loose and diarrhoea, dysentery, summer complaint and other bowel troubles set in, immediate attention should be given and the discharges checked before they become serious.

To check these unnatural discharges there is a remedy in Dr. Fowler's Extract of Wild Strawberry, a remedy that has been on the market for the past 88 years. It is rapid, reliable and effective in its action. A few doses is generally all that is required to give relief. Get it at your drug or general store; put up only by T. T. Millum Co., Limited, Toronto, Ont.

More Specimens Needed

Few Arctic Birds in Collection At Royal Ontario Museum

Bird specimens, numbering 250, collected along the Hudson Bay coast between Churchill and Eskimo Point, are ready for shipment to the Royal Ontario Museum, to be added to the collection of 10,000 used for research and ornithological studies. The collector, Arthur C. Twomey, of Edmonton, student of the University of Alberta, who undertakes this work as a private enterprise, has had many specimens accepted by the museum during the past three years. A selection will be made from the shipment when it arrives.

L. L. Snyder, ornithologist at the museum, says the collection of birds from the sub-Arctic is still small. The bird skins used for studies are kept in steel cupboards and placed in long trays, several members of a species together for comparison and examination for variations. The birds appear in natural form, but are, in fact, merely the skins with feet, beak and feathers intact. The skins are turned and stuffed with cotton to provide a body.

The birds from Hudson Bay will not be on exhibition, but share the extensive moth-proofed cupboards that already contain close to 20,000 birds. Of the 768 specimens which belong to North America, the Royal Ontario Museum has a fair representation, but there is a requirement for larger collections of the Arctic birds to make more complete the knowledge of Canadian species.

Mr. Twomey will spend the remainder of the summer, it is learned, in collecting other specimens found in Northern Alberta. He is one of several ornithologists and naturalists who make collections for the museum.

World's First Black Rose

No Sign Of Shading Appears In Fragrant Petals

Flowering under the watchful eyes of numerous park attendants, the world's first black rose, pride of the great Sangerhausen rosarium, is drawing thousands of visitors to this small Harz town.

The unique flower, the creation of which was recently announced, is a cross between two extremely dark varieties of roses—"Chateau de Gloire" and "Lord Castleberg." It is of a vivid deep black-red hue, so dark—especially in dry, hot weather—that it may be described as black. The fragrant petals show no shading whatever.

Some 400,000 roses in 9,000 varieties are on display. Most of the credit for this achievement belongs to 60-year-old Professor Ewald Gnau, supervisor of the gardens, who is affectionately known as the "rosen-vater" (father of the roses).

Good Crop Of Hay

Thousand Tons Cut At The Pas During Two Weeks

More than 1,000 tons of hay were cut for local use during two weeks in the Carrot River Triangle, all within a 15-mile radius of The Pas, according to estimates made there.

Several outlets have been operating in the area. Hay is good this year. High water did not affect it. It is of better quality than for many years past, haymen say.

A. St. Godard cut 400 tons, Transport Limited 200, and others including Frechette, Allard, as well as settlers of the Carrot River Valley, smaller lots.

The Indians of The Pas reserve have also garnered enough for winter fodder.

ON BOARD THE "EMPERESS OF BRITAIN"

"That's a good one," John Nelson (right), president of Rotary International, may have been saying to George Stephen, traffic vice-president of the Canadian Pacific, as the camera-man snapped this aboard the liner "Empress of Britain," just before the boat docked at Southampton, Thursday, August 24, Or, it may have been the other way round—it was not a sound camera. Both are aboard in the performance of their duties. Mr. Nelson to attend a regional conference of Rotary at Lausanne, and Mr. Stephen to visit Canadian Pacific headquarters in Great Britain.

SHE LOST 32 lbs.

New Frocks No Longer Worried Her

"How did she lose that 32 lbs. of fat?" is what you will be asking. Let her tell you herself:

"About 18 months ago I weighed 178 lbs.—which I can assure you annoyed me very much. Everything seemed a worry to me, especially new clothes. Nothing would fit the comfortably, and walking was unbearable. I was advised by a friend to try Kruschen Salts, and I am very glad I did, too. During the first ten months I lost 28 lbs. of fat. Now, for the last 6 months my weight has been 146 lbs., and I feel much better in health. I have all my weight tickets to substantiate my statements."—(Mrs.) M. P.

Kruschen contains those six mineral salts, proportionately balanced, found in the waters of those famous European spas used by generations of fat people to reduce weight.

Kruschen helps blood, nerves, glands and body organs to function properly—you gain new strength and energy—feel years younger—look better, work better.

Apathy Towards Reading

Caused Often By Publisher's Praise Of Inferior Books

The inventor of the policy of "truth is advertising" died in New York this week before he had got the book publishers of his country to see his point. For the United States is "distinctly not a book-reading country," says Lincoln Schuster, New York book publisher. And he blames it in great part on the colleges which he says, create in too many of their students an apathy towards reading.

But surely the greatest creators of apathy towards reading must be, after all, the publishers themselves. In recent years, or at least so it seems to many old-time readers, the making of books has become indecently commercialized. Far too often have innocent readers been wrangled into buying an inferior book by the misleading ballyhoo put out by the publishers. Such an experience is not calculated to arouse in the reader's breast an uncontrollable desire to rush out and buy more books.—Brandon Sun.

Poison Antidote

Discover Effective Medium To Offset Effects Of Carbon Monoxide Poisoning

Discovery of a sulphur-sodium antidote more effective against carbon monoxide poisoning than anything previously known is claimed in a report published in New York by John H. Draize of the University of Wisconsin.

The antidote likewise surpasses anything else in effectiveness against cyanide poisoning, he says. He credits the cyanide discovery to B. Forcell, an Italian scientist.

The antidote is sodium tetrathionate, a well known synthetic chemical. Its constituents are sulphur and sodium. Draize used it by intravenous injection on poisoned rabbits.

An Innocent Stowaway

A Scot was engaged in an argument with a conductor as to whether the fare was five or ten cents. Finally the disgruntled conductor picked up the Scotman's suitcase and tossed it off the train, just as they passed over a bridge. It landed with a splash.

"Mon," screamed Sandy, "isn't it enough to try and overcharge me, but now you try to drown my little boy?"

Back taxes are being paid in wood in Carinthia, Austria.

Experiments In Taxation

Record Of English History Shows Very Few Things Escaped

There have been many strange experiments in taxation in English history. Henry the Eighth taxed beads, and graduated the tax according to the position of the wearer. The Sheriff of Canterbury was constrained to pay the sum of three shillings and fourpence for the privilege of wearing whiskers. Elizabeth likewise put a similar tax on every beard of over a fortnight's growth. Elizabeth was also bent on making the country of a religious turn of mind, and all who stayed away from church on Sunday rendered themselves liable to a fine. In 1695 it was decided that births should be taxed. The birth of a child to a Duke cost the proud father thirty pounds in taxes, whilst the coming of a commoner child into the world was made the occasion of a tax of two shillings. Bachelors and widowers were compelled to pay for the privilege of single blessedness. It was William Pitt who instituted the window-tax. In the reign of George the First it was necessary to have a license in order to sell hats. Then there was a tax on hair powder and a tax on watches and clocks. In the reign of George the Third a duty of two shillings and sixpence was imposed on bricks. At a later period in the same reign bricks were divided for the purpose of taxation, into common and dressed bricks, and the duty on each kind of brick was regulated according to its size.

Paid For Grumbling

Man In England Earns Good Living Finding Fault

A London man earns a living by going round the city finding fault with everything. One day he went into a tea shop and found that the shape of the teacups they used was clumsy. It was impossible to drink out of them without spilling the tea. So he wrote to the company about it and the cups were changed. He wrote to the London Underground and told them that passengers could alight at a certain station without presenting a ticket. Upon another occasion he saw that a big sign in the West End of the city was not working properly. He told the company owning it that anyone standing on the other side of the street could not read it, and it was changed. His job arose from a life-long habit. If ever he saw anything was wrong he used to write to the owner about it. He merely used to do it as a matter of principle, but he was paid out of a job he suggested that if his criticisms were of any use he should be paid for them. Now he makes a handsome income from being a grumbler!

Has Massive Program

Russia Planned Big Increase In Production This Year

With the launching of the second Five-Year Plan, Russia has outlined a programme of massive production for this year. For 1933 big increases are planned in agriculture, electricity, coal, oil, iron and other metals, machinery, chemicals and in general manufacturing. Thus, whereas in 1932 about 64,000,000 tons of coal were produced, 84,000,000 are budgeted for this year, and the output of 6,000,000 tons of steel in 1932 is to be increased to nearly 9,000,000 tons. It is also planned to raise the number of cattle from less than 5,000,000 in 1932 to 9,000,000, and that of pigs from 4,000,000 to 5,000,000.

LUNCHEON TOMATOES

Two cups cooked tomatoes; ½ cup sweetened condensed milk; 2 cups dry bread, broken in pieces; 1 teaspoon salt; ¼ teaspoon pepper. Grated American cheese. Heat tomatoes to boiling point. Add sweetened condensed milk and stir until well blended. Remove from fire, add bread and seasonings. Cover tightly two minutes. Four into serving dish, sprinkle generously with grated cheese. Serve at once. Serves six.

Victory For the Lawyer

A solicitor, who had been asked out to dinner and was delicately "pumped" for legal information by his host, sent in a bill for "advice." To this the host responded with a demand for payment for the dinner eaten by the solicitor. Equal to the occasion, however, the latter promptly threatened a prosecution for selling wine without a license.

This Clock Is Different

A bronze lion, twelve feet high, which will roar at noon, and a clock, six feet high, which will grow at sunrise and sunset, are features of a huge new clock erected in Messina, Sicily.

One Good Roll

Deserves Another

This is what men say when they make the acquaintance of Ogden's fine cut cigarette tobacco.

It rolls more easily—that is the first thing that you discover—then light up, and learn the rest of the good news. Sweeter, more fragrant, mellower—all any smoker could ask in a fine cigarette.

That's why so many men have tried it—liked it—stuck to it. Use Chanteclair cigarette papers with it and you will get a still better smoke.

SAVE THE POKER HANDS

OGDEN'S FINE CUT

Your Pipe Knows Ogden's Cut Plug

Tea Is Old Beverage

Beverage Used Long Before Beginning Of Christian Era

Tea was known long before the beginning of the Christian era, and though by the thirteenth century it was a universal drink in China, it was not until nearly four hundred years later that Europe began to hear of tea through the Portuguese and the Dutch. The first Englishman to mention tea was a Mr. Wickham in 1615. He wrote from Japan to a friend asking for three silver porringers from which to drink tea. Tea was first sold publicly in England in 1657. It fetched from 15s. to 50s. a lb. in the leaf. It was also sold in liquid form, made, so the vendor said, according to the directions of the most knowing merchants and travellers in the East. The year 1839 was a date never to be forgotten in the history of the British Empire, for it was the year in which Empire-grown tea was first sold in England.

Air Is Essential

A great need of the soil for crop growth is that of an air supply. Every one realizes the importance of air for animals, but that it is needed for plants is not such common knowledge. Roots and vegetables mould and spoil very quickly if deprived of a circulation of air. Cellars, therefore, should be ventilated to secure the passage of air throughout every part of it.

Glasgow, Scotland, will establish a radio patrol police force.

All foreign workers have been prohibited entry into Spain.

Improves flavour of meats, fish and vegetables. Pays for itself many times over. All dealers, or write—

Appelhof PAPER PRODUCTS HAMILTON, ONTARIO

Occasional Wife

EDNA ROBB WEBSTER
"JORETTA"
LIPSTICK GIRL, etc.

SYNOPSIS

Camilla Hoyt, young and beautiful student in an art school, unconsciously sketches the head of a fellow student during class and when she is supposed to be drawing a Grecian urn. The professor, looking at her sketch, embarrasses Camilla by having Peter Anson, the boy whose head she sketched, criticize her work before the class. Afterwards Camilla goes to the park outside to cry. A hand touches her shoulder. It turns out to be Peter, who apologizes for his action and consoles her. Camilla secretly admires him. He makes a date to see her that evening but is astounded when she names an expensive night club. It is far beyond his means, but he resolves to go through with it. Peter takes her to the theatre first and then to the night club where they meet some of Camilla's friends. After talking her home, Peter resolves not to take Camilla out again, because of the expense. He is only a struggling artist. Camilla wonders why he did not ask her to go out again. In school they are cool to one another, and for a few days things go badly between them until he again meets her sitting in the park.

(Now Go On With The Story)

CHAPTER VI

Camilla's shy smile was like an appeal to Peter to understand everything she knew and didn't know about herself. Some instinct told him that she needed him, yet he feared to remain. He glanced away through the lacy green of new leaves toward the glistening white walls of the museum.

"I live pretty much around here, day and night. You know I teach a beginner's class over there three evenings a week."

"Oh, do you?" her eager face lightened. "Then, that is why I haven't seen you, isn't it?"

"Yes, I've been—pretty busy," his words stumbled awkwardly. "I can't keep late hours often with so many responsibilities."

"Then I shouldn't have kept you out late on Tuesday night," remorsefully.

"Oh, once in a while can't hurt me," she laughed, "and it's not that I can't stand the pace, but the profs won't stand for it."

"I'm sorry. Did you get razzed about Tuesday?"

"Oh, no."

"Why didn't you tell me you had classes of your own? I shouldn't have suggested—"

"We had a good time, didn't we?" "Wonderful! Did you?"

"Best in my life!" he declared.

"Then—you haven't—avoided me because you were angry with me?" hesitantly.

"Of course not! And I haven't tried to avoid you," he prevaricated. "What made you think that?"

"Well," her eyes followed the toe of her slipper as she drew imaginary lines in the grass, "you didn't call again, or ask to see me."

"But I wanted to," the words were impulsive, and spoken before he knew it.

She looked up at him again with shining eyes. "Then it's all right," she said softly.

"You really cared that I didn't call on you?"

"Yes, very much."

"I'm sorry," he said gently. "I should have phoned you, even if I was busy."

"And please don't think you have to take me places that keep you out late, just to see me. She forfeited her last ounce of pride in a final desperate appeal.

"What could we do, then?"

"Why—we might sit here and just talk, or you could come to my house—"

"I'd prefer it here."

"So should I."

He wondered if he could be dreaming. Could it be possible that Camilla Hoyt preferred to come and sit in the park with him, to the society of her friends and their favorite haunts?

"Do you mean that you would like to come here—and talk with me—sometimes?"

"Any time. I often come here and sit alone in the evening. I never knew, though, that you were teaching over there, so near me."

"And I never knew you were so

near, either. Will you be here, to-night?"

"Do you want me to be?"

"Very much. I'll be finished at nine o'clock."

"Then I'll be here," she promised. They walked on together to the parkway and separated happily in anticipation of the evening. Peter tried to reprove himself for what he had done. He had resolved that the only way to manage his attraction for Camilla was to forget her and stay away from her. It would be a long time before he could forget—probably he never could—but he had been determined not to see her alone again. Now, he had yielded again. But what could he do, when a girl who could go anywhere with anyone she chose declared that she preferred to sit and talk with him in the park?

More than that, when he longed with an intense and twisting ache to be with her every moment that was possible.

He found her there as she had said she would be, when he hurried away from his class that evening. As he approached she arose and went slowly to meet him. She wore white—a soft woolly white jacket, of which the collar suggested closely against her black hair. The night was breezy. She was bareheaded, and the black hair in the depths of the white collar was like the blackness of her eyes in the depths of her white face. Her gait was wistful, he thought, as she greeted him.

He found her there as she had said she would be, when he hurried away from his class that evening. As he approached she arose and went slowly to meet him. She wore white—a soft woolly white jacket, of which the collar suggested closely against her black hair. The night was breezy. She was bareheaded, and the black hair in the depths of the white collar was like the blackness of her eyes in the depths of her white face. Her gait was wistful, he thought, as she greeted him.

"You are not interested. You don't want to listen?"

"Of course," he assured her earnestly. "That is just the trouble. I am too interested in you. I have been ever since the first day I saw you in Drake's class. I'll always remember the minute you walked into that room," he reminisced with pleasure. "You have been in my thoughts ever since."

She sighed softly. "I know. That is why I have to tell you about me. So that you can forget, too."

His heart beat quickly with fearful apprehension. Was she going to tell him that she was engaged to marry some other fellow in her price class? Probably. But she didn't act very happy about it. And why should she tell him—for sympathy? Was it possible that, even yet, girls

These are the masks men wear To hide the truth from sight: The dark design of care, Forbearing as the night; The masks of hate and fear, The sullen mask of pride; They don them year by year And shut themselves inside.

But I have learned to read The thoughts beneath the mask: The longing and the need, The courage for the task; And I have found behind Grim looks and visage cold Hearts that are true and kind, Where dreams like flowers unfold.

In masks men often go To hide the truth from sight: The dark design of care, Forbearing as the night; The masks of hate and fear, The sullen mask of pride; They don them year by year And shut themselves inside.

But I have learned to read The thoughts beneath the mask: The longing and the need, The courage for the task; And I have found behind Grim looks and visage cold Hearts that are true and kind, Where dreams like flowers unfold.

Electric Washing Machines

Demand For Hand and Other Power Machines Rapidly Falling Off

Electricity, which is abundant and cheap throughout the larger part of Canada, is rapidly providing the motive power for a variety of domestic appliances that were formerly propelled by hand. Take washing machines as an example: From 1927 to 1932 inclusive the number of electric machines manufactured in Canada totaled 345,061 compared with 105,289 hand machines and 13,805 other power machines. The demand for hand and other power machines is rapidly falling off. In 1927 a total of 21,841 of the former and 1,980 of the latter were made. In 1932 only 5,220 hand machines and 630 of other power machines were placed on the market compared with 47,340 electric machines that year.

There are 17 factories in Canada engaged in the manufacture of washing machines. In 1932 the total value of their output was \$3,241,323. Most of the washing machines used in Canada are of domestic make. Imports of such machines and parts and wringers last year were valued at \$338,089. The exports had a value of \$123,981.

She sighed softly. "I know. That is why I have to tell you about me. So that you can forget, too."

His heart beat quickly with fearful apprehension. Was she going to tell him that she was engaged to marry some other fellow in her price class? Probably. But she didn't act very happy about it. And why should she tell him—for sympathy? Was it possible that, even yet, girls

Village of Chinook

Notice is hereby given that, under the provisions of the Tax Recovery Act, 1929, the Village of Chinook will offer for sale, by public auction, at the office of the Secretary-Treasurer, on Saturday, the second day of September, 1933 at 2 o'clock in the afternoon, the following lands:

Lots	Block	Plan
18, 19, 20,		
21, and 22...	1	2231 B. A.
9 and 18...	2	"
8 and 17...	4	"
7, 9, 10, 11, 12,		
13 and 14...	5	"
4, 15 and 16...	6	"
6, 10 and 23...	8	5633 C. L.

Each parcel will be offered for sale subject to a reserve bid, and subject to the reservations contained in the existing certificates of title. Terms, cash, unless otherwise arranged.

Redemption may be effected by payment of the full amount of arrears and costs at any time prior to the sale.

Dated at Chinook, Alberta, this twenty eighth day of June, 1933

Thos. Gilbertson,
Secretary Treasurer.

Public Notice

In order that the classes may be organized for the year, it is essential that all who propose taking High School work in the Chinook Consolidated School be present on Monday, Sept. 4, 1933, even though they may not be able to be in regular attendance for a few weeks or so.

Signed on behalf of the principal,

by, Lorne Proudfoot,
Secretary.

No. 1

For generations, medical men have paid tribute to the sustaining, invigorating and health-giving qualities of properly brewed lager beer, when taken in moderation, for workers in every field of endeavor, whether mental or physical.

Scrupulous care in selection of ingredients and painstaking supervision of an expert staff of brewers contribute to the excellence of Alberta Beers.
